

Change the Cost Basis Accounting Method on My Schwab Brokerage Account Information Sheet

Use this form to change the cost basis accounting method at the account level or for specific assets held in your account. **You must complete this form to make changes between the Average Cost Method and the Identified Cost Method.**

Schwab's default cost basis accounting method for open-end mutual funds (open-end MFs) is the **Average Cost Method**, as described below. Schwab's default cost basis accounting method for equities, exchange-traded funds (ETFs), exchange-traded notes (ETNs), closed-end mutual funds (closed-end MFs), options, and fixed income is the **Identified Cost Method** with the **FIFO Lot Selection Method**, as described below. Please consult a certified tax professional to determine the cost basis method that is appropriate for your tax situation.

You can change the **Lot Selection Method** for all securities that are currently set to the **Identified Cost Method** in your account, **except** open-end MFs, by going to www.Schwab.com > **Service** > **Account Settings**. If you want to change the **Lot Selection Method** for open-end MFs currently set to the **Identified Cost Method**, call us at 1-800-435-4000.

Do not use this form to identify or match specific lots for unsettled trades. Please call 1-800-435-4000. To provide cost basis updates to existing uncovered positions, please go to www.Schwab.com > **Accounts** > **Positions** > **Market Value** or **Unrealized Gain/Loss** or complete the **Cost Basis Update Form for Non covered Shares** found on www.Schwab.com > **Service** > **Account Servicing** > **Forms**, or call 1-800-435-4000.

There are two components of cost basis accounting at Schwab: the **Cost Method** and the **Lot Selection Method**.

- The **Cost Method** determines how to calculate the cost of securities sold to determine gains and losses.

1) The **Average Cost Method** calculates the average price for shares bought and sold, regardless of how long they are held, by allocating the gains and losses evenly across all shares. Assets using the **Average Cost Method** will default to the **FIFO Lot Selection Method** when disposed (i.e., sold, journaled, transferred, or other closing transactions).

Note: Only the following asset types are eligible for this cost method: open-end MFs, closed-end MFs, ETFs, ETNs, and equities enrolled in the Schwab StockBuilder Plan[®] for dividend reinvestment. You can only select an asset type or asset group listed on this form.

2) The **Identified Cost Method** reflects the actual cost basis for each individual lot bought or sold. If you select this cost method, you must select a **Lot Selection Method** (described below).

Note: All security types are eligible for this cost method.

- The **Lot Selection Method** determines the order in which lots are selected.

- **First In, First Out (FIFO):** The first lot acquired is the first lot selected. If lots are missing cost basis, these lots will be selected first.
- **Last In, First Out (LIFO):** The last lot acquired is the first lot selected, regardless of whether lots are missing cost basis.
- **High-Cost Lot (HCLOT):** For long positions, the lot with the highest cost is selected first; for short positions, the lot with the lowest cost is selected first. Lots with missing cost basis will be selected after lots with known cost basis are selected.
- **Low-Cost Lot (LCLOT):** For long positions, the lot with the lowest cost is selected first; for short positions, the lot with the highest cost is selected first. Lots with missing cost basis will be selected before lots with known cost basis are selected.
- **Tax Lot Optimizer™ (TLO):** Lots are selected with the objective of taking losses first (short term then long term) and gains last (long term then short term). Any shares moved will be processed using the HCLOT method. Lots with missing cost basis will be selected after lots with known cost basis are selected.

When will the election go into effect?

The new cost basis changes will apply to this account only after the date the method was changed on your account. We **will not** retroactively apply these changes to your account.

How do I deliver this form to Schwab?

Return the completed form by using secure messaging on www.Schwab.com; fax to 1-888-526-7252; or mail to Charles Schwab & Co., Inc., IS Document Control, 1945 Northwestern Dr., El Paso, TX 79912.

Change the Cost Basis Accounting Method on My Schwab Brokerage Account

www.schwab.com 1-800-435-4000 (inside the U.S.) +1-415-667-8400 (outside the U.S.) 1-877-686-1937 (multilingual services)

Clients of Investment Advisors: Contact your advisor directly or call Schwab Alliance at 1-800-515-2157.

Only complete the appropriate section(s) to change your cost basis accounting method on either your entire account and/or on a specific asset(s) held in your account. Please refer to the Information Sheet for cost basis accounting methods and definitions. Changes are on a "go forward" basis.

Return the completed form by using secure messaging on www.Schwab.com or fax to 1-888-526-7252.

Change the Cost Basis Accounting Method on:

Schwab Account Number Name(s) on Your Schwab Account as Displayed on Your Statement *Please print.* Daytime Telephone Number

Change From the Average Cost Method to the Identified Cost Method.

You can change the **Lot Selection Method** for all securities that are currently set to the Identified Cost Method in your account, **except** open-end MFs, by going to www.Schwab.com > Service > Account Settings. If you want to change the **Lot Selection Method** for open-end MFs currently set to the **Identified Cost Method**, call us at 1-800-435-4000.

The **Identified Cost Method** can be used on all security types.

Apply the Identified Cost Method to all assets and asset types in my account. Choose only one Lot Selection Method below. (If you do not choose a Lot Selection Method, we will use your current Lot Selection Method.)

FIFO LIFO HCLOT LCLOT TLO

Apply the Identified Cost Method to the specific asset(s) listed below. (Choose a Lot Selection Method or we will use the existing method on your account. Complete additional forms to add more assets.)

_____ FIFO LIFO HCLOT LCLOT TLO

_____ FIFO LIFO HCLOT LCLOT TLO

Change From the Identified Cost Method to the Average Cost Method.

Average Cost Method can only be used on the following security types: open-end MFs, closed-end MFs, ETFs, ETNs, or equities enrolled in the automatic dividend reinvestment plan (the Schwab StockBuilder Plan for dividend reinvestment.)

For information on the Schwab StockBuilder Plan for dividend reinvestment, go to www.Schwab.com > Products > Investment Products > Dividend Reinvestment or call 1-800-435-4000.

Apply the Average Cost Method to an asset type or asset group listed below and retain the existing cost method for all other asset types in my account. (The Lot Selection Method will be FIFO per IRS regulations.)

All open-end MFs All open-end and closed-end MFs All open-end MFs, ETNs, and ETFs

All open-end MFs, closed-end MFs, ETNs, and ETFs

All equities. (This selection requires equities to be enrolled in the automatic dividend reinvestment plan, the Schwab StockBuilder Plan® for dividend reinvestment. Only equities that are enrolled will be updated.)

Apply the Average Cost Method to the specific asset(s) listed below. (Equities listed below need to be enrolled in the automatic dividend reinvestment plan, the Schwab StockBuilder Plan for dividend reinvestment. Only equities that are enrolled will be updated. The Lot Selection Method will be FIFO per IRS regulations. Complete additional forms to add more assets.)
